EDUCATION

User Experience Design B.S. May 2018

University of Utah

Key Classes:

Interaction Design: Presented concept for Rocky Mountain ATV web application solutions at Adobe's enterprise office

Capstone Design Studio: Worked with United States Forest Service to create a mobile application for forest visitors

Data Structures and Algorithms: Expanded my knowledge of back-end programming and database architecture

Business Model Innovation: Established the links between entrepreneurship, innovation, and strategy by examining value creation, profit models, and competitive advantage

Related Classes:

Data Science, Human-Computer Interaction, Object-Oriented Programming, Creating Interactive Web Content, Design Studio 1, Typography, Human Performance and Engineering, Digital Marketing

WORK EXPERIENCE

User Experience Designer December 2017 - Current Maintenance Connection | Salt Lake City, UT

- Redesigning the Express mobile platform to allow for offline maintenance fixes and database downloads
- Conducting customer research and interviews for a maintenance technician persona
- Creating new UI/UX design prototypes that will be tested on real customers and adjusted accordingly

User Experience Design Intern May 2016 - August 2017 United States Forest Service | Ogden, UT

- Successfully implemented an SEO plan to optimize communication between the Forest Service and the public
 - Viewership was increased 300%
- Used wireframes, storyboards, and click-able prototypes to achieve user driven designs for a mobile "Traveler's Guide" application for two National Forests, this work was coordinated with a development team in Washington D.C.

AWARDS

Regional Forester Team Award: Awarded for having the most innovative website out of the nine U.S. Forest Service regions

Segal Education Scholarship: Awarded for exceptional work and web design
